

To obtain your residence permit you must be insured in the state system. Therefore, you will need to present to the territorial body of the General Immigration Inspectorate where you request the granting of this right a certificate issued by the Health Insurance House or the individual employment contract accompanied by the ReviSal "print screen", if you are employed in Romania.

These documents must be valid on the date of filing the application.

The insurance is concluded with one of the Health Insurance Houses on the territory of Romania: the National Health Insurance House, the Health Insurance House of the Ministry of Transports, Constructions and Tourism or the House of Health Insurance of Defense, the Public Order, the National Security and the Authority court.

On the first extension of the right of residence, foreigners can provide health insurance for all risks normally covered by Romanian citizens.
